

## Year 5 Computing: Home Learning Week 11

Greetings Year 5!

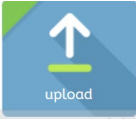

This week's activity focus is: abstraction!

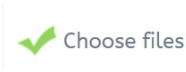

Take care, stay alert, stay safe!

Mrs P, in ICT ☺

Task	Description																																										
1	<ul style="list-style-type: none"><li>On your computer, open a new Word file. Save it as "recipe shopping list *initials*". (The initials are so I can see that it is your work!)</li></ul>																																										
2	<ul style="list-style-type: none"><li>Draw a table onto your document. Go to the Insert tab, at the top, and select Table.</li><li>Click on the arrow and select a table that is 2x8. Once you click on this it should flick into your document.</li></ul> <table><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table> <ul style="list-style-type: none"><li>Move the middle line to the left, by clicking on it, holding it and dragging to the left. To move it, you will see a sign that is a left facing arrow, two vertical lines and a right facing arrow.</li></ul> <table><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr><tr><td></td><td></td></tr></table> <ul style="list-style-type: none"><li>Add numbers 1 – 8 into the boxes on the left, like this</li></ul> <table><tr><td>1</td><td></td></tr><tr><td>2</td><td></td></tr><tr><td>3</td><td></td></tr><tr><td>4</td><td></td></tr><tr><td>5</td><td></td></tr></table>																																	1		2		3		4		5

3	<ul style="list-style-type: none"> <li>• Abstraction is about simplifying things – identifying what is important without worrying too much about detail.</li> <li>• You are going to complete a task using abstraction by picking out the important information needed to make a cake, whilst ignoring unimportant detail.</li> <li>• Look at the recipe below</li> </ul> <div data-bbox="349 365 799 1028" style="border: 1px solid black; border-radius: 15px; background-color: #4a90e2; color: white; padding: 10px; margin: 10px 0;"> <p style="text-align: center;">Heat the oven to 180C</p> <ul style="list-style-type: none"> <li>• Beat the butter and sugar together</li> <li>• Stir in the vanilla</li> <li>• Whisk in the eggs</li> <li>• Stir in the flour slowly</li> <li>• Pour in the milk</li> <li>• Mix everything together well</li> <li>• Pour into the tin</li> <li>• Bake for 20 minutes</li> </ul> </div>
4	<ul style="list-style-type: none"> <li>• On your Word document, in the table, type into the line next to each number, the ingredients that you will need to make the cake. One ingredient per line.</li> <li>• Now save your work, by clicking on the File tab, and Save. (You already saved it as “recipe shopping list *initials*” so you don’t need to use Save As!)</li> </ul>

5	<ul style="list-style-type: none"> <li>• BONUS TASK – how smart are you?</li> <li>• Now look at the recipe below, and complete the task using a new table. Put the table underneath the previous table on your Word document.</li> </ul> <div data-bbox="296 248 791 1238" style="background-color: #4a86e8; color: white; border-radius: 15px; padding: 10px; margin: 10px 0;"> <ul style="list-style-type: none"> <li>• Heat the oven to 180C</li> <li>• Grease and line 2 x 20cm sandwich tins</li> <li>• Put 250g butter and 250g sugar into a large mixing bowl</li> <li>• Beat well until they are combined</li> <li>• Mix in 1 tablespoon of vanilla essence</li> <li>• Add the 4 eggs, 1 at a time, beating well after each addition</li> <li>• Add 250g self-raising flour and mix thoroughly</li> <li>• Add 1 tablespoon of milk and mix well until all ingredients are combined.</li> <li>• Divide the mixture between the tins evenly</li> <li>• Bake for 20 minutes</li> </ul> </div> <p>HINT – think about the things you may need that don't go into the cake!</p> <ul style="list-style-type: none"> <li>• How many rows will you need on your table?</li> <li>• Can you add another column, so that there is a list of edible and non-edible items?</li> <li>• Once you have finished, close down your file, so that you can do the next part!</li> </ul>
6	<ul style="list-style-type: none"> <li>• When you have saved it, try uploading it to school 360, so that I can see your progress.</li> <li>• To do this, first sign into school360 – there's an instruction sheet on the home learning page if you don't know how to do this</li> <li>• Now click on <b>resources</b>. This is on the main school360 screen.</li> <li>• Then click on <b>J2E</b></li> </ul> <div data-bbox="794 1686 930 1803" style="text-align: center;">  </div> <ul style="list-style-type: none"> <li>• Now click on <b>upload</b> – it looks like this</li> </ul>

7	<div data-bbox="667 152 853 224"></div> <ul style="list-style-type: none"><li>• Now click on <b>choose files</b> - This is in the middle of your screen.</li><li>• When you do this, a menu will come up, like it does when we save the work at school.</li><li>• Choose the file you wish to upload – it should be the file you saved before called “recipe shopping list *initials*”.</li></ul>
