

Year 7 Computing: Home Learning Week 11

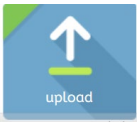

Greetings Year 7!

This week's activity focus is: debugging

Take care, stay alert, stay safe!

Mrs P, in ICT ☺

Task	Description
1	<ul style="list-style-type: none">On your computer, open your internet browser (that's the one you use to search for things on the internet – maybe internet explorer, or google chrome). use this link to read information about Debugging. <p>https://www.bbc.co.uk/bitesize/topics/zkcqn39/articles/ztkx6sg</p>
2	<ul style="list-style-type: none">Open a new Word document.At the top in font size 14, write the title Debugging. Choose a sensible style (that I can read!!)On the next line, change the font size to 12.Answer the following questions, based on the information from the website.<ol style="list-style-type: none">What are the two types of computing bugs?Which one of the bugs is caused by spelling errors?Which type of bug caused a computer to stop working in 1947?
	<p>Have a look at the coding for Scratch. I want to make the cat draw a square, but it doesn't seem to work. Can you see why not? What kind of bug is in the programming? What would I need to do to correct the coding? Where would the correction go?</p>  <p>The image shows a Scratch script starting with a 'when green flag clicked' event block, followed by a sequence of six blocks: 'move 100 steps', 'turn 90 degrees' (right), 'move 100 steps', 'turn 90 degrees' (right), 'move 100 steps', and 'turn 90 degrees' (right). This sequence is intended to draw a square, but the 'turn 90 degrees' blocks are all set to 'right', which would result in a spiral instead of a square.</p> <p>Add a subtitle under question c. on your Word document – “Scratch Debugging” – then answer these questions on your Word document.</p>
3	<ul style="list-style-type: none">When you have finished the project, save your work to your file on the computer. Do this in the same way that you would in school. Save into the place you are saving all your home learning – save it as “Debugging” and add your initials.

4	<ul style="list-style-type: none"> • When you have saved it, try uploading it to school 360, so that I can see it. • To do this, first sign into school360 – there’s an instruction sheet on the home learning page if you don’t know how to do this • Now click on resources. This is on the main school360 screen. • Then click on J2E  <ul style="list-style-type: none"> • Now click on upload – it looks like this • •
5	 <ul style="list-style-type: none"> • Now click on choose files - This is in the middle of your screen. • When you do this, a menu will come up, like it does when we save the work at school. • Choose the file you wish to upload – it should be the file you saved before called “Debugging *intials*”. Then I should be able to have a look at your work.
