

## Year 7 Art Summer Term

### Lesson 2– Fruit Cross Sections

In this lesson I would first like you to create pencil studies of pieces of fruit cut in half. Draw a 'shady bar' at the top of your page and remember to use all of the different pencil tones or shades in your sketch.

Aim to sketch at least two different pieces of fruit in detail.

These fruit are particularly interesting to draw when cut in half:

- Tomato
- Pepper
- Orange
- Kiwi
- Lemon
- Strawberry
- Grapefruit
- Watermelon
- Pomegranate

Next, use paint, coloured pencil or water colour pencil to complete colour studies of the same cross-sections. Sketch them again, this time without shading and then complete the colour study.
